

The Palace, S. F.
11/24/92 2 P.M.

My Dear Sam.

I am just in from my soup at "The
Kumata" and the Dis office. He took my tempera-
ture and says it is but 92 deg. above normal.
But my pulse is the mystery. He said for the
first 10 beats after he took my wrist it was
normal and then it raced ahead for the balance
of a minute at the rate of 99 to 100. It has
been over 90 all day. My tongue he
says is satisfactory. Wants to see me
tomorrow and says he thinks I can get
away Monday next. Asked particularly
after you & if you went up last night.
I missed you very much. Did not
get to sleep until after midnight, and
Emmanuel woke me up with a fit of cough-
ing that made me think I should have
to take care of him. He says he often
has them, and has been out all day.
I hope you are getting through safely.
Thought of you much last night & this morning.
C. Crafty Jr's father W. J. C.
